mitchelltubrett@gmail.com
<https://www.linkedin.com/in/mitchell-tubrett>

Mitchell obtained an IT-Programming diploma from NSCC graduating in 2021 and has since expanded his career into both the software development and system / server administration fields. While working as a technical analyst, Mitchell's primary responsibilities included providing technical support, database maintenance, server-side infrastructure design, automation scripting, extensive work with M365 and their admin portal, among other duties. During his time at Pineapple Bytes & Dymaxion Mitchell's background in programming allowed him to identify issues within the work structure and take the initiative to create customized solutions.

Currently employed at Nautel Mitchell is working towards being active in a DevOps role, helping Nautel align themselves with a more cloud-based, modern approach. Outside of his daily tasks Mitchell leads various projects, including the shift to the cloud, to ensure that Nautel is up to date in its environment and as secure as possible.

Skills

- OOP Programming – C++, JS, Python, C#, Java
- Experience with Datto, Synology & QNAP back-up solutions

- Network Diagnostics, VPN, DNS, DHCP
- PowerShell Scripting
- PHP, Laravel, React, CSS, HTML, etc.
- Virtualization
- Public Speaking

Experience

FEB 2024 – PRESENT

Technical Support Specialist / Nautel LTD. **Hackett's Cove, Nova Scotia**

Mitchell is currently employed as a Support Specialist for Nautel. He's responsible for maintaining the servers, monitoring & troubleshooting network activity, providing internal client support, and leading projects to enhance infrastructure. These projects can range from searching out new software, different processes as a service (SaaS), heading the transition into a primarily Cloud driven environment, establishing the Linux and development environment for the software teams, writing scripts for automation, maintenance, and SQL queries. His daily workload is managed through Jira, but he interacts with many different types of backup technologies, our CRM (Salesforce), ERP (Syspro), and other software that employees use as part of his troubleshooting process.

NOV 2022 – FEB 2024

Technical Analyst II / Dymaxion Technical Services

Halifax, Nova Scotia

In his role at Dymaxion, Mitchell was hired for Server Administration. His expertise in programming allowed him to write PowerShell scripts for streamlined server and workstation maintenance. He also created and managed various servers including file servers, Active Directory, DHCP/DNS, and Terminal servers.

His problem-solving skills were often called upon for identifying server issues and conducting server migrations. Beyond these core duties, Mitchell handled Tier 2 support tickets, conducted on-site visits, contributed to infrastructure design, and offered client training, among other responsibilities.

MAR 2020 – SEP 2022

Technical Analyst / Pineapple Bytes

Burnside, Nova Scotia

Education & Certifications

2025

Project Management / EMC

Halifax, Nova Scotia

Mitchell is currently enrolled in EMC's project management course. It is derived directly from the PMI and teaches the foundations of project management from creating project charters, Gantt charts for structure and budget / risk management.

2025

Beyond the Cloud / ICTC

Halifax, Nova Scotia

Mitchell is currently enrolled in ICTC's beyond the cloud cohort. Ranging from socket programming, network troubleshooting, AZ-500 and other courses. This course consists of 5 other courses which will be listed on my LinkedIn page.

2019 - 2021

IT Programming Diploma / NSCC

Halifax, Nova Scotia

After High School Mitchell took some time after attending a few years of university to decide what he would like to do. Mitchell took a specific interest in software development as a hobby after high school which led to his enrollment for NSCC. During the final year of his diploma, Mitchell excelled in his Social Media website project, concluding with his graduation in 2021.
